

Introducing the **HSCN IDEA LAB!**

Welcome to a new commitment from HSCN to help improve efficiencies and decrease variation in the delivery of healthcare across Canada.

Through surveys and day to day interaction, HSCN members and leadership alike recognize the unique position and opportunity HSCN has to bridge gaps, share information and connect people and organizations solving similar challenges.

WHAT

The Idea Lab has been created to share success stories and, most importantly, the lessons learned from healthcare supply chain related initiatives across Canada.

WHY

HSCN members collectively touch a significant portion of the healthcare products consumed across Canada. There is tremendous leverage and advantage from improved communication and information sharing in Canada's healthcare supply chain industry.

HOW

HSCN is investing in resources and technology to assist with the creation and dissemination of sharable materials focused on measurable successes, lessons learned, and network building to improve the value of dollars invested in the healthcare system.

WHEN

First articles are coming shortly. Our goal is to publish new material every quarter.

WHO

Call for submissions: If you have completed a project that you'd like to share, or know someone who has, please send an email to **administration@hscn.org**.
